Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Applicant cancelled claims 1-23.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 24-37 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-14, respectively, of prior U.S. Patent No. 6,596,153. This is a double patenting rejection.

Allowable Subject Matter

3. **Claims 38-51** are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 38-44, None of the prior art of record teaches or suggests a microprocessor programmed to measure the electrical output of the electrochemical sensor on a periodic basis to produce sensor measurements, calculate a reaction factor, a discharge factor, and an amplitude factor associated with the electrical output of the electrochemical sensor based on the sensor measurements, and calculate the quantity of the electrochemically convertible substance in the gas sample using an

arithmetic equation based on the reaction factor, the discharge factor and the amplitude factor; and a display to display results in combination with the rest of the claim limitations.

Regarding claims 45-51, None of the prior art of record teaches or suggests a microprocessor programmed to measure the electrical output of the electrochemical sensor on a periodic basis to produce sensor measurements, calculate a reaction factor and a discharge factor associated with the electrical output of the electrochemical sensor based on the sensor measurements, compare a combination of the reaction and discharge factors to a combination of predetermined reaction and discharge factors associated with one or more predetermined reactants, and identify the electrochemically convertible substance as one of the one or more predetermined reactants existing in the gas sample in combination with the rest of the claim limitations.

Prior art

4. The prior art made record and not relied upon is considered pertinent to applicant's disclosure:

Porter et al. ['853] disclose breath analysis device.

Thompson ['840] discloses time clock breathalyzer combination.

Gammenthaler ['746] discloses apparatus and method for determining a person's sobriety.
